ORACLE® Aconex

Procedure Example

This diagram illustrates one way to manage Squad Checks using Aconex Documents & Workflows. Project teams will need to evaluate whether this will work for them, factoring in things like delivery method and contractual requirements.

Set up Aconex to complement the way you work

Below you'll find some features and functionality that you may find useful in setting up your procedure. Based on your project's needs, you may use one, some, none or all of these.
